Projects

VR Products Store (VR Website)

(chiluka.ccbp.tech)

Developed a responsive website for VR products where users can see a list of products, detailed information about a product and trending blogs, contact us info

Designed page using HTML structure elements, footer elements by using different bootstrap components to show different sections in the website.

Implemented responsiveness by using Bootstrap grid system and flex classes and CSS box model properties through a mobile-first approach.

Technologies used: HTML, CSS, Bootstrap

Lights On Off (Dynamic Website)

(creativitmouna.ccbp.tech)

Developed a Dynamic application that when we turn on the switch the bulb glows and when we turn off the switch the bulb turns off.

Maintained a cat and bulb in such a way that when we **ON** the switch dynamically the background color changes to green as well as the bulb glows and also the cat will be visible.

When we **OFF** the switch dynamically the background color changes to red and bulbs get off and also only the eyes of the cat are visible.

Technologies used: HTML, CSS, Bootstrap, Javascript.

Online Book Store (Book Search)

(hellomounika.ccbp.tech)

Developed online bookstore which shows popular books it is a one type of static website where some books you like to see implemented responsiveness using different Bootstrap classes through the mobile-first approach. You can read the related books you want. You can also see various popular books.

Technologies used: HTML, CSS, Bootstrap.
